

R.A.G.

In short, the aim, is to produce alternative papers for students to practice with prior to their Key Stage 2 SAT's.

We're not into *analysis paralysis* and very conscious that we don't want to increase anyone's work load, so we've tried to keep this simple ... we like simple!! So simple in fact that we think the below sums it up:

TWO WAYS TO GENERATE PAPERS

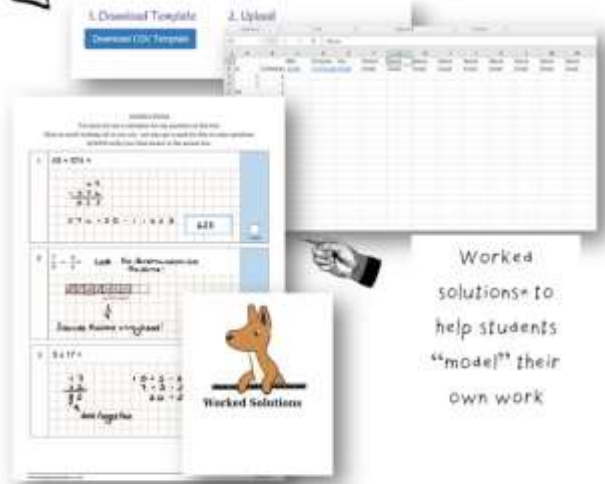

Single paper entry

"Similar" alternative questions generated

Video solutions for original questions for additional support

Multiple student upload

Worked solutions to help students "model" their own work

Simple to use ... we like simple!

There is also the facility to upload data for multiple students.

1. Choose the year and paper for which you want to generate personalised alternative papers for your students

2. A template will be generated which you'll need to download

3. Open or save somewhere obvious

4. Enter student names and email address that you want the papers sent to (it could also be sent direct to parents)

5. Add extra students here and delete any unused columns

6. Enter students scores for each question underneath their name

8. Upload from your saved location

7. Once complete ... remember to save it!

9. CLICK THIS!!

PLEASE NOTE: MULTI UPLOAD IS LIMITED TO 40 STUDENTS
